

TERMINAL 418 INFOGUIDE

VISION

Terminal 418 is a venue for interactions and encounters in the path of growth and personal engagement with attendees. The experience we wish to foster is a calm personal engagement removed from the noise and chaos of the event. The atmosphere is designed to be slightly whimsical but grounded in the concept of a mechanical forge.

MISSION STATEMENT

Terminal 418 focuses on “respite, reflection, repair”.

INCLUSIVITY

Terminal 418 is a venue, not a clubhouse. We wish to ensure that everyone feels welcomed and included. Barstool seating time should be limited to allow for inclusivity when there is a crowd. We enforce an ~30-minute limit or 1 drink per sit-down rule. No smoking of any kind is allowed.

APPROPRIATION IN THEMING

We wish to foster a playful Japanese robot toy aesthetic without being a Japanophile. Please do not accept any gifts that include the fetishization or fascistization of Asian culture. Do not accept or display any national flags or sexualized depictions of people.

LORE

Terminal 418 is an access point for a derelict mecha factory. Mertie has connected his mecha to the Neotropolis grid through this terminal to further his objectives of being a temporary ambassador for his people and returning to his homeworld.
